Objective

Motivated and results-driven AI/ML enthusiast actively seeking internship or entry-level positions in Artificial Intelligence, Machine Learning, Deep Learning, or Data Science. Strong foundation in data preprocessing, model development, and algorithm optimization. Passionate about leveraging AI to develop scalable, real-world solutions. Committed to continuous learning and contributing to cutting-edge technological innovation.

Projects

Research Navigator: Semantic Paper Analyzer

[GitHub](#)

Stack: Python, Sentence Transformers, LangChain, FAISS, FastAPI, HuggingFace

- Architected an end-to-end Retrieval-Augmented Generation (RAG) pipeline for document analysis, replacing traditional keyword searches with intent-based retrieval.
- Engineered an ingestion system performing automated PDF text extraction, metadata filtering, chunking, and FAISS indexing with MiniLM embeddings.
- Implemented prompt engineering techniques to assemble retrieved contexts for response generation, reducing literature evaluation time by 60%.
- Evaluated retrieval quality using customized cosine similarity metrics and structured verification test sets.

Shnoor Meetings: AI-Enabled Video Platform

[GitHub](#)

Stack: FastAPI, React, WebRTC, Supabase, Whisper-v3 API

- Co-developed a real-time collaborative video conferencing engine integrating auto-transcription and LLM-powered abstractive summary generation.
- Configured high-performance WebRTC streams alongside backend APIs served on FastAPI, optimizing database read/write speeds with Supabase.
- Programmed secure data governance controls to scrub PII and filter out conversational filler words before generating final meeting deliverables.

Zomato Review Sentiment Analysis (NLP Classification)

[GitHub](#)

Stack: Python, Scikit-Learn, NLTK, TF-IDF

- Built an end-to-end NLP classification pipeline that processes and cleans unstructured consumer review corpora.
- Extracted features utilizing customized TF-IDF tokenizers and optimized classification performance using Multinomial Naive Bayes.
- Achieved an 88% F1-score in classifying sentiment polarity, proving execution competence in classification and model evaluation.

American Express Credit Card Default Prediction

[GitHub](#)

Stack: Python, TensorFlow, Keras, Pandas, Scikit-Learn

- Built an Artificial Neural Network (ANN) model to identify and predict risk patterns for credit card defaults.
- Performed extensive exploratory data analysis, handled missing value imputations, and optimized neural network layers to boost default-risk identification.

Netflix Movie Recommendation System

[GitHub](#)

Stack: Python, Matrix Factorization, KNN, XGBoost

- Developed a personalized movie recommendation system using collaborative filtering algorithms.
- Evaluated recommendation accuracy and predictive error metrics using RMSE and MAPE.

Education

Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning

Sri Indu Institute of Engineering and Technology, Telangana

Jun 2022 – May 2026

CGPA: 8.9 / 10 (Merit Student)

Intermediate Education (MPC)
Vagdevi Junior College, Mahabubnagar, Telangana

May 2020 – Jun 2022
GPA: 9.56 / 10

Secondary Education
Brilliant Grammar High School, Hyderabad, Telangana

2019 – 2020
GPA: 9.7 / 10

Experience & Activities

Software Intern
Snoor International LLC

- Working on software development and AI/ML-related tasks in a highly collaborative environment.
- Gaining hands-on experience in real-world project development, debugging, and implementation workflows.

Apr 2025 – Present
Remote

AI/ML Intern (Springboard Internship 6.0)
Infosys Springboard

- Developed a Research Analyzer application using NLP and LLM models to summarize and analyze academic research papers.
- Gained hands-on experience in model building, prompt engineering, and end-to-end AI application development.

Jul 2025 – Oct 2025
Online

Virtual Intern
Infosys

- Completed virtual internship focused on core Artificial Intelligence concepts, industrial practices, and practical algorithms.

Aug 2025 – Oct 2025
Online

AI/ML Self-Learning Journey
Self-Guided

- Enrolled in specialized AI, ML, and Deep Learning courses on Coursera to build hands-on projects in Python.
- Explored Agentic AI, Generative AI models, and participated in tech community events to share collaborative knowledge.

2023 – Present

Skills

Programming: Python, C (Basic), Java (Basic)
Libraries: NumPy, Pandas, Seaborn, Matplotlib, Scikit-Learn, TensorFlow
Machine Learning: Regression, Classification, Clustering, Supervised and Unsupervised Learning
Deep Learning: CNN, RNN, NLP, Generative AI
Generative AI: Google AI Studio, Streamlit, Google Cloud
Agentic AI: Phidata, LangGraph, LangChain
Problem Solving: Data Structures and Algorithms (DSA)
Visualization & Other: Power BI, Prompt Engineering, AI Automation, Analytical Thinking

Certifications & Achievements

- Machine Learning Specialization** (Coursera - DeepLearning.AI, Feb 2025): Deeply covered Neural Networks, CNNs, Unsupervised Learning, Recommenders, and Reinforcement Learning.
- Artificial Intelligence Certificate** (Infosys Springboard, Jul 2025): Completed foundational course covering AI concepts, ML algorithms, applications, and ethics.
- Gen AI Exchange Program Certificate** (Hack2Skill, 2025): Hands-on training with Generative AI tools, GPT models, and prompt engineering techniques.
- AIML Internship** (Systemtron Technologies, 2025): Practical AI/ML development, data preprocessing, and model evaluation.
- Workshop Certificates:** Certified in AI Primer, Intro to AI, Deep Learning, Computer Vision, Generative AI Principles, OpenAI GPT Models, and NLP.
- Professional & Academic:** Merit Certificate for academic excellence in college. Certified in Agile Scrum, High-Impact Presentations, Email Writing, and Time Management.
- Digital Verification:** Access all credentials in my centralized [Google Drive Folder](#).

Leadership

-
- Led awareness campaigns on AI ethics and emerging technologies, promoting responsible AI adoption.
 - Coordinated workshops on AI trends, fostering active teamwork and leadership skills.
 - Mentored peers on innovation and ethical considerations in AI through structured peer groups.
